

# Get Sales Copilot Right in 30 Days

## THE CHALLENGE

### How to Give Your Sellers Back a Day a Week Without A Big Tech Project

In 30 Days – With Sales Copilot Plus Chat GPT  
Is Your Tech Fuel or Friction for Your Sales Team?

Did you know that 34% of seller time is spent on administrative tasks? That same seller uses over 10 systems to do their work. With all the systems – over half of sellers say that tech is just causing friction.

While Tech can clearly cause Friction – Technology can be either **friction** or **fuel** for your sales team. Sellers spend 6-8 hours a week entering data in CRM. Viva Sales is a seller app that automatically enters data from Outlook and Teams.

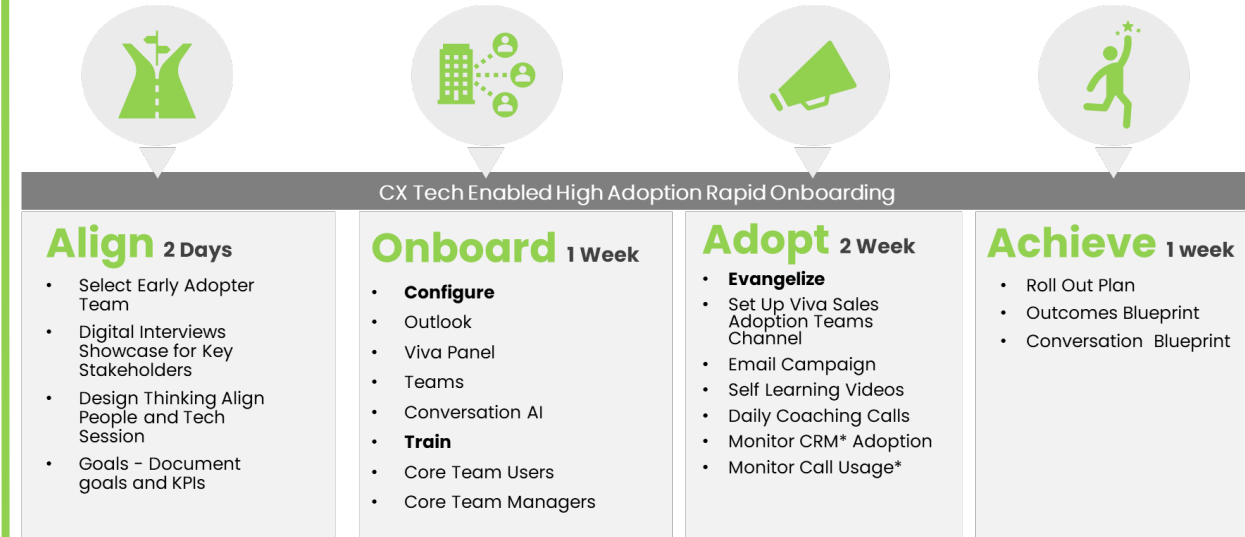

Save your team a day a week by turning friction into **fuel** with **Sales Copilot** to automate CRM Data Entry.
